VIDEO TRAINING

If you haven't already, sign up for my mini-course to get video tutorials on how to use these files!

ALREADY A PRO?

I've taken out the boring part of creating printables...so you can start **CREATING!**

Read on to learn more about The Printable Packet!

NEED TO KNOW

CAN I SELL PRINTABLES USING THE PRINTABLE PACK?

ABSO-FREAKIN-LUTELY!

(that means yes, by the way)

You can use my templates to create your own printable designs, then you can use those to sell, offer freebies on your site, or any other way you need printables for your business.

That INCLUDES the bonus patterns and borders!

I only ask that you:

**THAT'S IT !!
TWO RULES!**

Do not sell the templates as is.

(this also includes selling my templates as JPEG's, PDF's or any other file type...they can only be sold if you use your own designs.)

Do not copy my branding colors.

I'M A BEGINNER AT ILLUSTRATOR. ARE THESE TEMPLATES EASY TO USE?

YER DURN TOOTIN'!

(also yes...want me to stop? okay, I'll stop..)

I created The Printable Packet so you can literally create gorgeous printables in minutes.

If you're unsure about something, I have a [mini-course](#) with step-by-step tutorials to help you out!

**ENOUGH OF
THAT...LET'S GET
STARTED!**

LAYER CODES

NO, I'M NOT TRAINING YOU TO BE SPIES...

(that'd be great, tho...)

I've simply color-coded the main layers you'll use by color. You'll be able to see these in Adobe Illustrator.

SOMETHING TO NOTE

Some files have more layers than others, and those color codes will be different for each file, but don't worry...I've labelled them so you'll know what to look for!

QUICK TIP!

You probably noticed there's not an envelope for 5X7...and here's why!

The typical printer only prints on 8.5"x11" paper. 5x7 envelopes are too large for that size, but I have a work-around!

Instead of providing a folded envelope, create a 5"X7" artboard in Adobe Illustrator and provide a cute printable that your customer can directly print on envelopes.
